@theamutorine

Basics first.

- Audience or target users
- Have a question you are trying to answer
- Method of analysis: Python, R or using an analysis tool

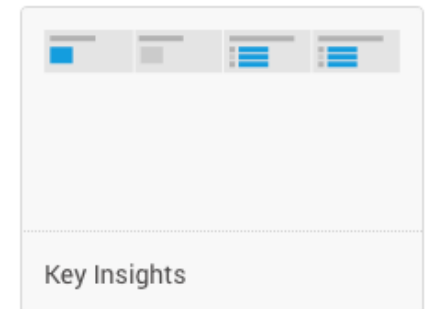

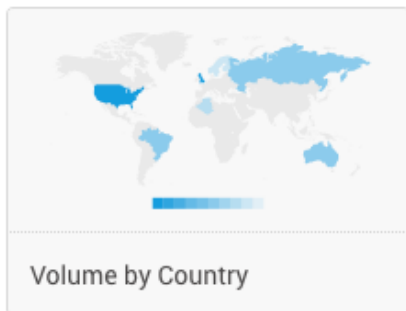

Materials

- Social Media Data Analytics by hirag Shah on **Coursera**

Social Media Data

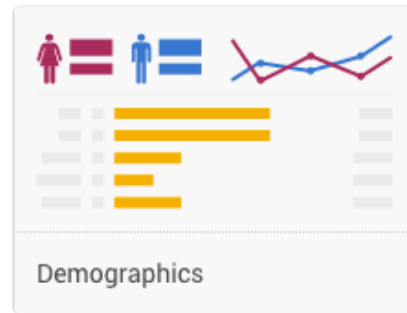

- Conversations
- People
- Measure

Measure

Conversation

People

How to ask the
right questions
that social
media can
answer.

- How can I make more people buy more of my cat food?
- How can I increase/elevate my shallow voice about cat food?
- Or how can I identify cat lovers?

A large, light blue outline of a lightbulb is centered on the slide. Ten short, light blue lines radiate from the top half of the bulb, representing light or ideas. The text "Turning social data into actionable insights" is centered within the bulb's outline.

Turning social data into

telling

To do ...

1. Scrape twitter data from last dsa tutorial -
<https://github.com/datsciafrica/presentations/blob/master/accra2019/README.md>
2. Take the free social media data analysis course
3. Explore social media data analysis with a self serve analytics tool
